PROFILE | SUMMARY

Oracle Developer with **20+ years of experience** in **Oracle PL/SQL, Oracle Forms, and Oracle Reports**, with strong hands-on expertise in developing and supporting **in-house ERP applications** within **MES and production-oriented environments**.

Strong background in **database design, backend development, and end-to-end enterprise application delivery**, including requirement analysis, design, coding, integration, testing, deployment, enhancement, and production support.

Recognized for strong **troubleshooting, debugging, and problem-resolution skills** in business-critical Oracle applications.

Also building practical capability in **AI, Python, Cloud, and DevOps** through hands-on personal projects, fully working local lab setups, and technical content published through **GitHub and social media**.

Currently focused on **Agentic AI systems**, with particular interest in integrating **LLM-driven intelligence with real backend enterprise workflows**.

EXPERIENCE

Gulf Aluminum Rolling Mill (GARMCO)

Manama, Bahrain

Sep 2014 - Present

Senior Oracle Developer

- Lead design, development, enhancement, and support of **in-house Oracle ERP / MES applications** using **Oracle PL/SQL, Forms, and Reports**.
- Delivered new application design, development, and integration for major plant operating lines including **Foil Mill, Remelt-2, and Continuous Caster**.
- Integrated Oracle-based applications with existing enterprise systems such as **SFDC, PMS, Sales & Marketing, Shipping, Finance, TMS, and Remelt-1**, as well as plant-level systems including **weighing scale, PLC, and HMI**.
- Support end-to-end application lifecycle activities including **design, coding, customization, enhancement, bug fixing, deployment, and production support**.
- Provide scheduled **24/7 on-call support** as part of weekly support rotation for business-critical production systems.

PERSONAL

Gender Male
